GGGI Africa Climate Finance Program for the Agriculture Sector

- Enhance CGIAR access to GCF funding and other climate finance institutions for multiple African countries
- GCF accreditation process support for NARES institutions and agricultural/development banks, per selected countries
- Create a financial vehicle that will address identified financial market gaps and mobilize appropriate financial resources to promote adaptation technologies to increase the agriculture sector resilience and productivity
- Improve knowledge of climate smart agriculture and climate data collection between NARES institutions including the CGIAR
### Technical assistance program to CGIAR & NARES (CORAF, ASARECA, etc) – Projects in the Pipeline

Agriculture Fund
West Africa: Agricultural Adaptation Facility - (Design Phase)

The Agricultural Adaptation Facility is a USD 120 million blended finance facility promoting climate adaptation technologies in the agriculture sector by providing adequate financial products to agricultural adaptation projects that are near-bankable and commercially viable.

**Key Highlights: Fund Impact Potential**

- Mobilize capital for climate adaptation in the agriculture sector.
- Provide capital to agricultural projects focusing on adapting to climate change impact.
- Promote the adoption of climate adaptation technologies in the agriculture sector.
- Support project development towards bankability: the AAF supports project preparation and development.
